Records preservation receipt

Fictional Copperfen Packaging | 10 April 2026

To the review coordinator: this receipt records the preservation action. The audit date remains unconfirmed; the relative wording below is intentional.

After the audit, Iven Pell photographed the unsealed test terminal.

The checklist reports a 0.18-second stop on all four cycles. The handheld meter was in calibration stores that morning, according to the issue register. A green sticker alone does not establish that a functional test happened. There is no injury report in this packet. We need the controller history before making a statement about how long the interlock was bypassed. The production schedule shows a customer rush order, but does not authorize skipping the test.

Prepared by Tavin Orliss. For internal reconciliation use only.

The signed audit report and an independent copy of the source register are still requested. This receipt is not a certification of the underlying allegations.

Fictional training evidence. All people, organizations and contact details are invented.
