Records preservation receipt

Fictional Larkmere Care Systems | 10 April 2026

To the review coordinator: this receipt records the preservation action. The audit date remains unconfirmed; the relative wording below is intentional.

After the audit, Oriel Fen preserved the bucket access policy in the incident vault.

The sample contains invented patient references only; no actual patients are represented. The export manifest counts 2,184 rows, with referral reason and appointment date fields. An unauthenticated HEAD request returned 200 in the attached test log. That establishes accessibility at that instant, not that any outsider downloaded the file. Access logging was enabled only after the bucket was closed, so the missing download log cannot settle that question.

Prepared by Elvi Sundren. For internal reconciliation use only.

The signed audit report and an independent copy of the source register are still requested. This receipt is not a certification of the underlying allegations.

Fictional training evidence. All people, organizations and contact details are invented.
