Records preservation receipt

Fictional Vesperglass Materials Lab | 10 April 2026

To the review coordinator: this receipt records the preservation action. The audit date remains unconfirmed; the relative wording below is intentional.

After the audit, Brenna Voss put the original machine export in read-only storage.

The K17 run IDs end 071 through 076. Each carries the instrument's clamp-slip flag and should be excluded with a reason, not replaced silently. The revised workbook has the same six decimal values and ordering as K12, including 42.137 MPa twice. We have not ruled out an import mistake. The investor chart omits the run IDs, which makes reconciliation impossible without the workbook. No clinical or product safety claim was tested by this experiment.

Prepared by Runi Caldrin. For internal reconciliation use only.

The signed audit report and an independent copy of the source register are still requested. This receipt is not a certification of the underlying allegations.

Fictional training evidence. All people, organizations and contact details are invented.
